

蚊子咬一叮

登革熱恐上門

臺灣夏日潮濕多雨，除環境清消外，
也要做好自身防蚊準備

若出現以下症狀，就有可能是感染登革熱，
提醒您應儘速就醫

發燒

頭痛

後眼窩痛

肌肉關節痛

出疹

Dengue fever

is spread by mosquitos

In the summer months the weather in Taiwan is damp and it rains frequently. As a result, it is important to keep the surrounding environment clean and take precautions to prevent being bitten by mosquitoes.

If you experience any of following systems you may have contracted Dengue fever, seek immediate medical assistance

Fever

Headache

Pain behind
the eyes

Muscle and
joint pain

Rash

Một lần muỗi đốt

cũng có thể mắc sốt xuất huyết

Mùa hè ở Đài Loan ẩm ướt và mưa nhiều,
ngoài việc làm sạch môi trường, bạn cũng nên
chuẩn bị công tác phòng chống muỗi.

Nếu có các triệu chứng sau,
có thể bạn đã nhiễm bệnh sốt xuất huyết,
bạn hãy nhanh chóng đi khám bệnh càng sớm càng tốt.
